Press Release

ffa Opens New London Office

ffa, a world-leading provider of 3D Seismic Analysis Software and Services to the oil and gas industry, has established new office premises in central London. In alignment with the company's continuous growth plans, the new office will let ffa capitalize on growing market opportunities and strengthen their coverage and support to clients world-wide.

Jonathan Henderson, ffa's Managing Director said, "ffa is currently implementing a rapid growth strategy. The ongoing success of this strategy requires having an excellent support network in place to maintain the high levels of service our customers have come to expect. The opening of our new office demonstrates our commitment to the marketplace and our expanding customer base in South East England."

The new office, located in one of the city's most vibrant areas just off Trafalgar Square, will be in full operation from the 2nd June. For further information, contact Dr Gerald Stein, +44 (0) 207 872 5563, gstein@ffa.co.uk.

Note to Editors:

1. ffa provides world-leading 3D seismic analysis Software and Services to the oil and gas industry.
2. ffa's unique 3D workflow's are designed to reveal and extract geological features from 3D seismic data, objectively and more accurately than is possible with conventional seismic techniques to allow geoscientists and engineers to make better decisions in less time, with higher confidence.
3. ffa's Services operation applies ffa software to help its clients improve E & P success and has worked on over 150 operational projects worldwide. Projects include characterisation of deep water channels offshore Angola, close focus fault imaging in the North Sea and delineation of complex salt bodies in the Gulf of Mexico.
4. ffa is an independent UK company with offices in Aberdeen and Newcastle-upon-Tyne.
