### **ffA Announce Office Move As Demand For 3D Seismic Analysis Software & Services Increases**

ffA has moved to new premises in Aberdeen as part of a company wide expansion.

“This is positive move for ffA which will allow the company to grow significantly over next couple of years,” commented Jonathan Henderson, Managing Director of ffA.

ffA is seeing a major increase in demand for its 3D seismic analysis Software and Services, which reduce subsurface risk for E&P companies by extracting geological features from seismic data with unprecedented speed and clarity.

“We work closely with our clients and the new office provides us with a substantial increase in space and facilities ensuring that we continue to have the capacity to meet our clients needs,” concluded Jonathan.
